

## Graham House

Framingham, Massachusetts

This involved the new construction of a (1) family residential house consisting of (4) Bedrooms and (3) full bathrooms including a large living and separate dining room and kitchen with a large family room downstairs in the basement.

This new house replaced an older house that caught fire due to a gas leak and hence had to be demolished and rebuilt.

**Design Completion Date:** 2003

**Project Architect:** Charles Bradley, III, AIA
